## **Methodology:**

As in previous years, D.I.S. has consulted with all of its front-end sponsors as well as with those companies not sponsoring the survey, in the effort to be as comprehensive reading brands and models as well as salient and accurate technology trends gathering. Clients were extremely helpful in aiding in the design of the questionnaire...and in recommending improvements to the process.

The transition in 2004 from the exclusive use of hard copy direct mail to our new method began as a combination of Direct mail collection grouped with the CATI houses and the on-line website (both using a synchronous questionnaire) where we collected the responses and data entered all of them for tabulation purposes. D.I.S. Consulting Corporation's new software and structure permits nearly endless cross-tabulations or correlations of different aspects of the questionnaire (consult with us if you want a special cross-tabulation done).

We invited professionals to the website – enrolled them – and collected their individual product data using an on-line method. Up to date mailing lists were used including the freshest (international) the NAB Show attendee list, the similar IBC list (also international) as well as numerous other industry sourced mailing lists like Kemp International. All of them were also merged together to form an e-mail list for domestic and international calls.

**INCENTIVES:**

Survey respondents will receive a copy of the latest [NAB/D.I.S. Broadcasting, Audio & Video Global Industry Trends Report for](#) their help, estimated to be worth \$450.00 USD to them.

**Clients Provide Inputs to Questionnaire and Report Format and Design:**

The questionnaire is designed to inventory installed brands and models, and stations, by product category. Data entry and computer tabulation is then done using a network of personal computers running the proprietary tabulation program. Microsoft Excel™ is used for the spreadsheets (tabs) and analysis is written in MS Word. A variety of color charts and graphs are provided, taken directly from the Excel spreadsheets. At the end of the project, clients receive a CD-ROM of all the data.

**STAFF EXPERIENCE:**

D.I.S. Consulting Corporation maintains seven regular staff and utilizes a project staff of seven others on its syndicated projects. This core research group is augmented by the use of other freelancers, as appropriate, for the individual projects undertaken.

**Pricing and Terms:**

Pricing is based on the number of regions and product categories desired. Each product category purchase includes the general reports. Brand image reports are included only with a purchase of three or more regions and/or product category reports. Pre-publication sponsor prices are lower than post prices.
